Integration into traditional kindergartens

As part of our early childhood programme, we offer support to help children with special needs become integrated into local traditional kindergartens.

Our staff – experts in integration – all have educational qualifications.

The goal of our integration assistance for traditional kindergartens is to make it possible for children with special needs to attend their local traditional kindergarten. Our staff, who specialise in integration, are there in person to help your child participate in kindergarten activities and provide support to both your child and the kindergarten.

They visit your child's kindergarten by the hour. They are part of the interdisciplinary early-childhood support centre team. If required, a closely interconnected network is assured.

Once the kindergarten in question has agreed, an application must be made to the respective district authority for social services or district youth welfare office to obtain these participation-assistance services.

We're happy to help you if you have questions about how to apply or about what is included in the integration assistance.

If you'd like, we can contact additional sources of assistance, advice and support for the aide in your kindergarten.
