We are here for you and your child.

You have a child of infant, toddler or pre-school age. Are you worried about your child's development in language, movement, perception, playing development, behaviour, or in connection with a disability?

You may have issues such as:

- My child is so restless. Does he/she have AD(H)S?
- Why do I always seem to be at my wit's end when bringing up my child?
- Why does the paediatrician see abnormalities in my child?
- How can I help my child who has a disability to integrate into his/her environment?

Then contact us.

Holistic support

Consultation: if you have questions about your child's development or behaviour.

Interdisciplinary diagnosis: after the consultation, we carry out a developmental diagnosis with your child. Diagnosis forms the basis for your child's progress.

Development and therapy: we create individual development goals together with you as parents. We offer logopedic, ergotherapeutic, physiotherapeutic and (healing) pedagogical early development to you and your child with special needs.

Special needs education can take place in your home, at kindergarten or in rooms at the early intervention centre. Therapeutic early intervention takes place in our very accessible rooms in Eislingen.

We are very well connected in the district of Göppingen and work closely with the Social Paediatric Centre, facilities for early childhood education, paediatricians, kindergartens, authorities, (self-help) associations and other institutions. So we can help you with the important decisions for your child and his/her development.

Early intervention in the IFFS is usually without any cost to you, as the costs are usually covered by your health insurance and as part of the integration assistance provided by the district of Göppingen.
